

Kawasaki Robotics e-News

Greeting for Inauguration

Dear customers and partners,

As of April 1, I have assumed office as General Manager of the Robot Business Division.

The world market for industrial robots had a drawback in 2019 due to the US-China trade friction and the new corona virus. The year 2020 is not clear because we do not know yet when the pandemic comes to an end.

However, I believe that the human wisdom can and will solve this disaster, and good economy will be back sooner or later. It is clear that the aging society needs robots for automation and labor-saving. In order to correspond to such strong needs, I have organized the Global Strategic Department to strengthen the network with overseas subsidiaries and distributors. Resources are also allocated in pursuit of expanding semiconductor and painting robot businesses through product differentiation.

In addition to our values of speed, responsibility and hospitality, I would like to start activities of 4Cs; "Challenge", "Change", "Communication" and "Cooperation" to offer excellent products and services of high added values.

I am looking forward to working closely with our customers and partners, and therefore appreciate your continued support.

April 1, 2020
Noboru Takagi
Executive Officer and GM
Robot Business Division
Kawasaki Heavy Industries, Ltd.

Kawasaki Robots 

Kawasaki took part in iREX2019 (International Robot Exhibition) in Tokyo and showcased new robots and latest technologies. If you missed the exhibition, or want to see it again, you can see them on our YouTube. Please check it out at the following URL.
