New general-purpose robot RS013N

To meet increasing demand mainly in the electronics and food industries, Kawasaki launched a new 6-axis general-purpose robot, RS013N that has the payload capacity of 13kg.

The RS013N has the top-level speed and motion range in its class while inheriting the advantages of the R series. It fits in and enhances the existing R series lineup to cover even wider needs of the market.

Salient advantages of the RS013N are:

- ✓ Top-level high speed and wider motion range in its class
- ✓ High degree of protection IP67 for all axes
- ✓ Flexible layout (slim and compact body, built-in harness and hoses and small interference radius around the body).
