Kawasaki Robostage

At its Robostage showroom, Kawasaki shows just how people and robots can coexist and get along. Come see and try out the latest technologies and creations from Kawasaki Heavy Industries!

Memorable souvenirs for all visitors!

Have your caricature drawn by a robot!

Fun for the whole family!

Operate a robot with a program you create!

\\ Largest gathering of Kawasaki robots! /

Dual-arm SCARA robots

duAro

You can operate duAro with a program you create. Use this experience to search for a better solution to issues you have.

Large robots BX series

BX series

KHI's large powerful robots can make and carry things at high speed. Between the big screen and display models, you will see for yourself how dynamic these robots are.

Medical robots

MS005N

Robots can work in germ-free rooms people cannot. See KHI robots that are already working in the medical and pharmaceutical fields.

Kawasaki Robotics

Kawasaki Robotics strives for a world in which people and robots coexist. Since beginning its industrial robot production in 1969, Kawasaki has contributed to the automotive, electronic, semiconductor, medical, and other industries both in Japan and worldwide. Kawasaki currently supports manufacturing globally with its world-class technology.

Kawasaki Heavy Industries

Since its establishment in 1878, Kawasaki Heavy Industries, with its innovative technology and unprecedented manufacturing, has expanded its field from land, sea, and sky to the deep seas and even to space. Kawasaki's foundation lies in its undying spirit of challenge.
