

Kawasaki Training has adapted some of our most popular courses for virtual delivery, allowing students to attend training courses regardless of location.

- Standard Operations & Programming (T & E Controllers)
- AS Language
- Cubic-S Safety Configuration & Setup
- More in development

BENEFITS OF ONLINE COURSES:

The Training Center staff leverages Kawasaki's K-ROSET simulation software to give students a realistic robot programming experience remotely. Through the robust virtual teaching platform, trainers explain concepts using collaborative white boards and utilize virtual breakout rooms for individualized attention.

- Cost-effective solution; no travel or lodging costs are required
- Students receive resource materials used in traditional coursework
- Basic K-ROSET simulation software experience
- Concepts learned in classroom can be transitioned to robots at students' facility

Contact Training@kri-us.com for course dates and availability.
