

Kawasaki Robotics Academy

Customer Information about Webinar

How does Webinar Work

**We use a video conferencing system Webex
You don't need any special software**

**The Academy trainers shares the PC screen and use webcam
and microphone to communicate with you**

**The Academy team prepared a training cell for K-Roset which you
can use to have similar experience like training at Kawasaki**

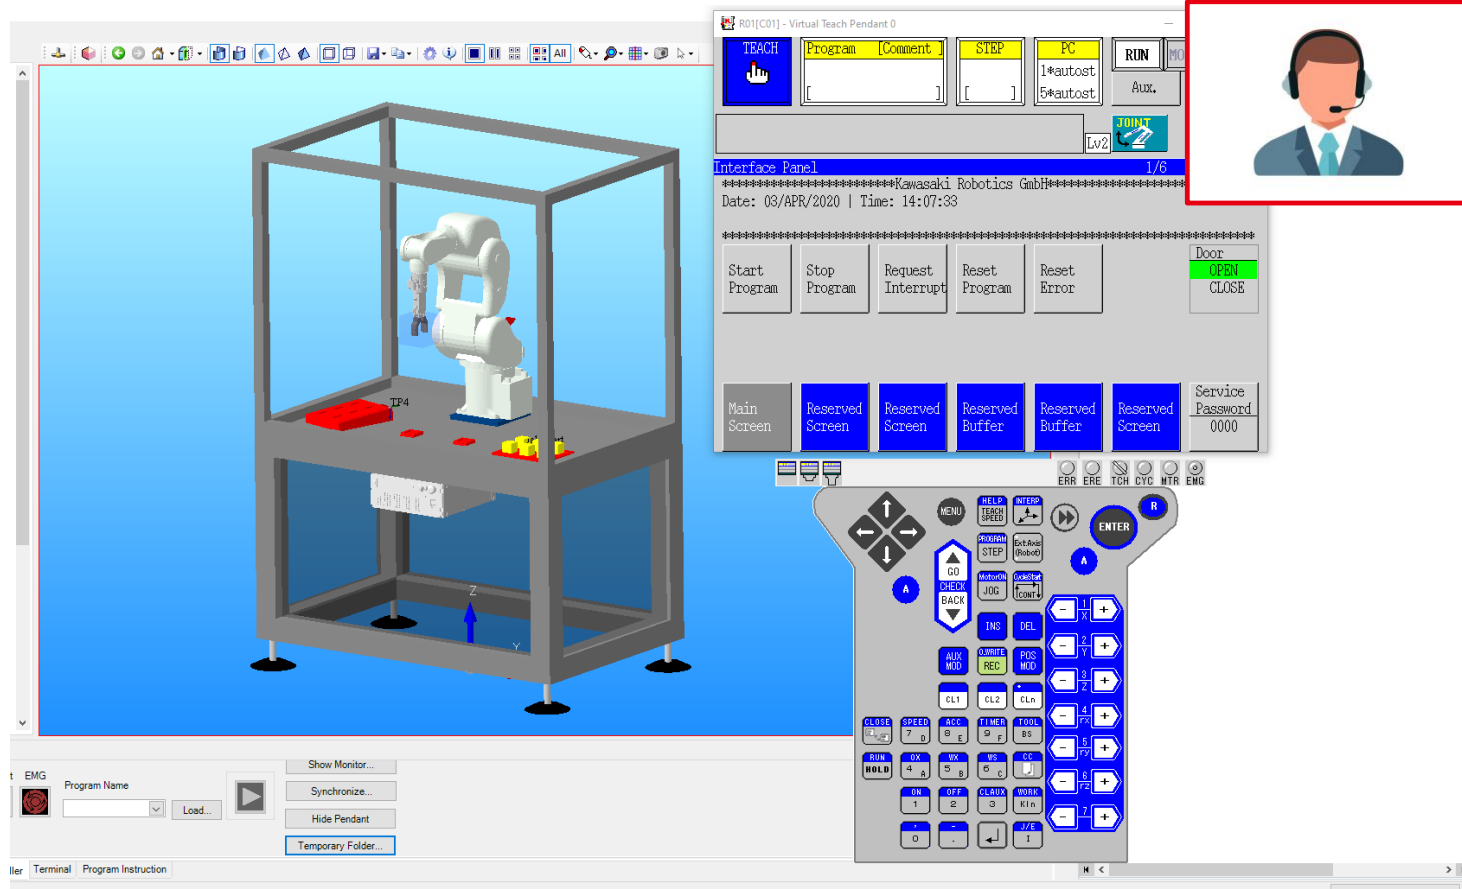

How does Webinar Work

Sample for Screen Sharing + Trainer Webcam

Screen of Trainers PC

Camera of Trainer

Trainings we can offer by Webinar

1 K-Roset

- The Academy provides this training by sharing the screen of trainers PC and keep communication by microphone and webcam with you

2 Programming Training

- Usually we use a real robot during the training but we can use K-Roset simulation software instead with a virtual training cell
- If you have real robot on side you can use it

3 Cubic-S

- Currently we use a real robot with Cubic-S hardware but we can also use simulation mode in CS-Configurator software instead
- If you have a real robot with Cubic-S on side you can use it

Other trainings are possible as well!

Minimum Requirements

PC / Mobile Device with Internet Connection

Optional Requirements

Microphone / Webcam

Robot System / Additional Kawasaki Hardware (e.g. Cubic-S)
