

Kawasaki Robotics (USA), Inc.

Operation and Programming

D, E and S Series Controller

- › The Kawasaki Operation and Programming course is designed to offer basic operations, safety, and basic programming training to Kawasaki robot operators, technicians, engineers, and programmers.

Course Structure

This course consists of approximately 50% classroom presentation and 50% hands-on exercises.

Course Goal

Upon successful completion, the participant should be able to demonstrate familiarity with all user interfaces and be able to perform all necessary power-up and power-down procedures, jog the robot in both joint mode and in Cartesian coordinates, create a Block Step program, teach a path, and edit and play back a path in both the single-step and continuous modes of operation.

Who Should Attend

This course is primarily intended for individuals who operate, program, and maintain the robot on a day-to-day basis, and other candidates who have the desire to be knowledgeable on the operations and programming of the Kawasaki D, E or S Series controllers.

Prerequisites

None

Course Length

4 days (28 clock hours)

D, E, and S Series Controller

Operation and Programming

Course Outline

- › General Robotics
- › Introduction
- › Safety
- › Overview
- › Power On/Off Procedures
- › Teach Pendant Introduction
- › Teaching Program Data
- › Testing Program Data
- › Executing Program Data
- › Editing Program Data
- › Data Management
- › Printing Data
- › AUX Menu Functions

Course Code

D/E Controller COECONT
S/S+ Controller COSCONT
