NOTE*1

Cooling of the electronic components in this open construction F60 controller is achieved by circulation of ambient air.

The enclosure is designed to protect personnel from coming in contact with hazardous parts inside the controller.

There is no protection to less than 10 mm of alien substance and water.

Please consider ①② and ③ and select the option about protection to the environmental specification

① There is no or few non-conductive dusts & particles(influence for the controller is little) ...Option is not needed.

② There is high possibility that non-conductive dusts & particle will get into controller. ...Select the option Intake Filter or Enclosed structure

③ There is high possibility that conductive dusts & particle will get into controller. ...Select the option Enclosed structure

NOTE*2

Category and Performance level (PL) are determined by the whole system and conditions.

The safety circuit of this controller is available in the system of category: up to 4, PL: up to e.

NOTE*3

Attaching additional unit makes size of a controller larger.
